First VR puzzel game I actually enjoyed for longer than 20 minutes.. Overall, Ys Seven is an engaging and enjoyable ARPG which brings hero Adol Christin back for another round with the forces of destruction.

So what doesn't Ys Seven do very well? Let's get it out of the way first: The main storyline is a lazy cliche. First, go collect five things related to the five elements Fire, Water, Air, Earth, and Moon. Got them? Ok. Now collect five different things related to those elements, and go confront the final boss to prevent the destruction of the land. That's the main storyline in a nutshell, and it really pains me how little effort was put into it. There is also very little exploration to be done in the game world, and what little there is amounts to making sure you find all the (fairly obvious) treasure nooks in each area.

That's not to say that the whole thing is boring to sit through. The interactions between characters are more interesting, for example. I grew fairly fond of the majority of the main cast and was generally interested in their thoughts and feelings about the things happening around them. Of course what every Ys game really emphasizes, and where this one shines, is combat!

Combat in Ys Seven varies by opponent, and for the most part each area has enemies that will ensure you are exercising your dodging skills. Most normal mobs are not terribly difficult once you learn their attack patterns, but most will require you to fight intelligently rather than button mash. Bosses range from fairly easy to very challenging. When I say this, I mean that their many unique attack patterns can make avoiding damage quite difficult. Not a problem on the "Normal" difficulty setting, where healing items will let you power through mistakes, but even hardcore gamers will find a challenge on higher settings. If you are looking for a fun and engaging action RPG, Ys Seven is definitely the game for you!. Accidently got this from a bundle, wish I didn't. No premise, unresponsive (and unsatsifying) controls, lazy graphics "retro art style", meh soundtrack, uninspired dialogue, too much time waiting around for obstacles/platforms to loop around. So far, the only fun part has been the pure platforming aspect while dodging multiple enemies, but then it quickly went back to force-feeding its underdeveloped gimmick. Don't waste your time on this trash no matter what the price is.. Adorable. And how many games go for a ZX Spectrum look? Adorable!. Very interesting logical platformer. Delaying a couple of evenings. Nice graphics in soft colors. Can not give a definitive assessment of the game, as played little games of this genre, but I realy liked it game. For all walkthrough encountered a couple bugs, but they were not so much on the scary.. After playing this game I now realise there are worse things than death. Beautiful atmospheric and fun Chronology is not far away from being a really quite excellent game. Unfortunately, the story isn't strong enough to carry it and it ends just as the puzzles are really hitting their stride. So well worth a look but maybe wait for it to pop up on the Steam sale.

RECOMMENDED [when on sale] Ratings : 8/10 (Great story, Great game mechanics, Overpriced)

This is an excellent RPG Maker game that is extremely well made. However, currently it is way overprice at \$30, and I would unequivocally recommend this game whenever it goes on sale at more than 50% discount.

What I love about this game is the epic storyline, the extremely well develop team of 17 NPC that you can recruit as your team members, each with their own background stories and individualized skills. Every one of the team member is different and unique and a delight to play. The game also have an excellent battle system and a very thought out crafting system, where you keep on crafting & upgrading your weapons and armors. You farm drops of various crafting materials from fighting monsters, mining and explorations.

Although this game is really good, I still feel that it is currently overpriced and not worth the full US\$30. There are several other great games (even with ratings 10/10 like the "Last Dream") that are selling at a fraction of the price of this game. I own several hundreds RPG Maker games, and this is probably one of the most pricey game that I have bought.

I would recommend this game whenever it goes on sale, and you can buy it at more than 50% discount.

. The original, the best.

Only game dedicated to paying homage to the horrors of the Zulu wars. Only game that features a fleshed-out Big Game HuntingTM minigame as part of the base game.

Has also been updated a lot since purchased (received in gift form from my good friend, Demifo) many moons ago, and I hope that trend will continue in the future (both in terms of updated features and new animals).

Thanks boys, may the winds of the great plains never warm up your beers.. I was really having some fun until I came to the last chapters before the great finale. It's just bad gamedesign, when the game crashes 7 times (!) during the gameplay and just before I can end the game I'm missing a little thing to complete a mission. Why do they let the player do things where a player loses this specific item before they made all the missions they have to do with it? I'm so frustrated now. The solution is to play all the hours again and make this little mission before I make the other one. Wow. Really not amused. A little warning would have been nice.... Do not buy anything that this company produces. What a hot steaming bag of garbage this game is, holy smokes! I honestly think I could make a better hockey game using a spreadsheet... It glitches, it crashes, and there are features of the game that do not function at all. Literally the worst game play experience of my life, and all I play are "boring" strategy games. The kicker is Steam wont refund my money either because it took me 4 hours to sift through all the crashes and glitches before I realized that there was nothing left but a giant turd of a video game. Save your money, and DO NOT BUY GAMES ON STEAM if you expect some level of buyer protection. Awful experience, I will see you all over at <u>GOG.com</u>. Hello.

This game strong and weak points:

Story. Above average when it comes to horror mostly because it does not have much story connection between the scenes, except the letters, but the dark scenery, music and let's not forget the scares, are very nicely done. 7/10
Art. Beautiful graphic in the scenes and detailed structure. It's very obvious that the team that created this game watches a lot of horror movies, plays a lot of horror games and has studied all the aspects of horror making games, but it still needs more imagination. 9/10

- Music 10/10

- Puzzles and characters. The puzzles are hard to understand sometimes which in fact makes it a good puzzle, so no point criticizing the puzzles to much, except to have a bit more character interaction to do a puzzle would benefit the game even more and having a few more puzzles would not hurt anyone. The characters like the zombie and the ghost are how can i say to plain, which in fact i can conclude that you don't have your own model creator. So if you plan on making a next game, which i think you do, you will need one or two who can do that part of work. So puzzles 9/10, characters 6/10.

In conclusion the score of the game, from the above listed facts, would be 8/10, but considering that this is your first experience in game developing and the first time you publicly announced a game i have to say that it is really good made and no one can make something perfect in his/her first time trying or without practise. So in future developing i wish you success.

Best regards,

Tx.. Fully enjoyed this game! I love the Indiana Jones franchise and I love LEGO, so this was a no-brainer from the start! The gameplay and puzzles are simple but still fun, the humour is quirky, all the levels are designed with so many extras, making them all replayable, and the game WORKS on Windows 10, with 2x XBox 360 wireless controllers and a Xbox 360 Wireless Gaming Receiver!!! My wife and I both played this endlessly on Steam Big Picture until we gained 100% - we were that addicted!. The Long Dark is the gold standard by which every other survival game would aspire to be.

The player navigates endlessly from quiet and calm isolation to moments of sheer terror and survival. The threat of death to cold, hunger, and wild animals is always in the back of your mind (and sometimes much closer). Yet even as your character struggles there is a peace about the game that brings players to grips with the one true enemy - yourself.

One misstep could literally be the beginning of the end in a series of rapidly unfolding events but the reward of each successful step forward is a victory against the unrelenting cold, unending hunger, and thirst which seeks to deprive you of your sanity.

Winning is not an achievement. Winning is simply surviving.
